

To know how to read, write and represent numbers to 100,000

- 1 a Write the number shown in numerals and words.

Using words and numerals, write what the number would be if I added one counter to:

- b the tens column c the hundreds column
 d the thousands column e the ten-thousands column

- 2 Complete the missing numbers.

- a $50,000 + 2,300 + 40 + 6 = \dots\dots\dots$
 b $\dots\dots\dots + 3,000 + 100 + \dots\dots\dots + 2 = 63,112$
 c $12,000 + 2,000 + 400 + 49 = \dots\dots\dots$
 d Partition 93,372 in 5 different ways.
 e Which of these is not a way to partition 12,543?

$10,000 + 2,500 + 40 + 3$

$12,000 + 500 + 43 + 3$

$10,000 + 2,000 + 543$

To know how to read, write and represent numbers to 100,000

3

a What is the value a?

Write the value of these numbers and add them to the number line.

b b is 4,000 less than a.

c c is 6,000 more than b.

d d is 10,000 more than c. Explain why it cannot be placed on this number line.

To know how to read, write and represent numbers to 100,000

Question Number	Question	Answer
1	<p>a) Write the number shown in numerals and words.</p> <p>b to e) Using words and numerals, write what the number would be if I added one counter to:</p>	<p>a) 38, 094 Thirty-eight thousand and ninety-four</p> <p>b) 38,104 Thirty-eight thousand, one hundred and four</p> <p>c) 38,194 Thirty-eight thousand, one hundred and ninety-four</p> <p>d) 39,094 Thirty-nine thousand and ninety-four</p> <p>e) 48,094 Forty-eight thousand and ninety-four</p>
2	<p>a to c) Complete the missing numbers.</p> <p>d) Partition 93,372 in 5 different ways.</p> <p>e) Which of these is not a way to partition 12,543?</p>	<p>a) 52,346</p> <p>b) 60,000 10</p> <p>c) 14,449</p> <p>d) Answers will vary but need to total 93,372</p> <p>e) The $12,000 + 500 + 43 + 3$ does not show 12,543</p>
3	<p>a) What is the value a?</p> <p>b and c) Write the value of these numbers and add them to the number line.</p> <p>d) d is 10,000 more than c. Explain why it cannot be placed on this number line.</p>	<p>Arrows should be accurately added to the number line for b and c.</p> <p>a) 90,000</p> <p>b) 86,000</p> <p>c) 92,000</p> <p>d) 10,000 more than C is 102,000. The number line only goes to 100,000 so 102,000 is larger than the end of the number line.</p>
